

# DE SERIES Thermoformers

PlastiVac's **DE** technology converts any **X, XX, XTX** or **DPA** model to a double ender machine. Dual platens allow for simultaneous heating of one sheet while another is being formed, reducing cycle times and increasing production output. Our fully adjustable forming tables are available in 1' increments from 4' x 4' to 10' x 24' sizes.

**DE** machines are available in the following stock sizes:
