

DPA Series Thermoformers

PlastiVac's **DPA** thermoforming machines are ideal for heavy-duty applications requiring positive and negative molds, high definition and deep draws. Standard twin heater enables use of plastic up to 3/4" thick. Fully automatic with freestanding PLC and remote control consoles, the **DPA** features plug delay in up and down positions. Can be configured with double-ender forming tables (**DE**) for higher production capacity.

DPA machines are available in the following stock sizes:
