### PlastiVac, Inc. Announces New Website

CHARLOTTE, N.C., -- PlastiVac, Inc (PVI), a veteran manufacturer of vacuum and thermoforming equipment, has launched a completely redesigned website at [www.plastivac.com](http://www.plastivac.com). As part of their ongoing initiative to ensure customers comprehensive service, support and improved technology, PVI 's site renovation features a greatly improved interface and broader scope of information:

- More attractive, expanded user-friendly interface
- Comprehensive machine/service descriptions
- Equipment documentation downloads
- Industry resources

PVI plans to augment site features over the next year, including a company/industry news section, language translations, plastics industry and thermoforming informational links, and online parts ordering.

-----

PlastiVac's enhanced web site is just one in a number of advances at the company. PVI's new management team, Martin Eichenberger (CEO) and Chuck Butcher (COO), bring over 40 years combined experience in quality management and process improvement, as well as in equipment building and automation technology. "We believe our expertise will greatly benefit PVI's thermoforming customers by providing immediate and widespread improvements in reliability, responsiveness and follow-through", said Eichenberger. "We're implementing a total-management approach, partnering with customers from initial process planning, straight through installation, on-site training, ongoing troubleshooting and service programs--even assistance with materials selection and sourcing for mold and plastic suppliers."

The new PVI team also plans to offer increasing turnkey production line solutions around the vacuum and thermoforming core, starting immediately with upstream and downstream automated processes. The company plans to utilize the improved website as an information portal as their capabilities and partnerships expand.

### About PlastiVac, Inc.
